At first I download the file. There was information about resort:

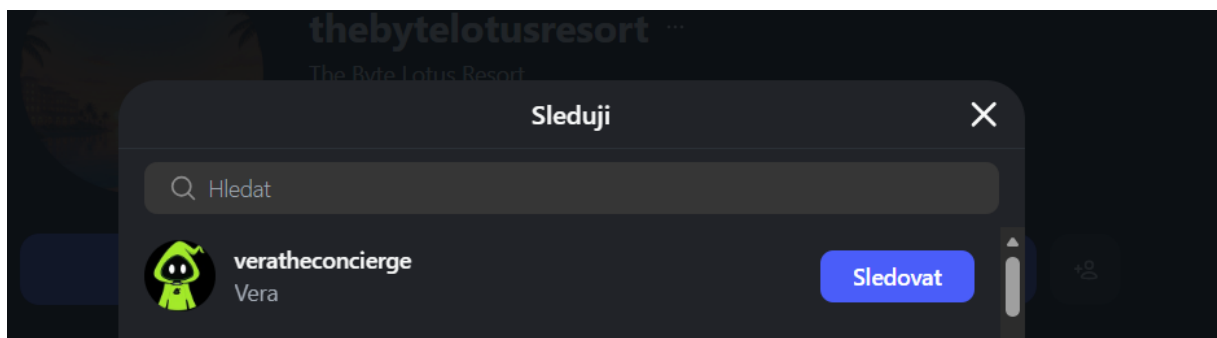

There is the first hint in the picture: Find us on Instagram or not. So, I checked the insta of the resort:

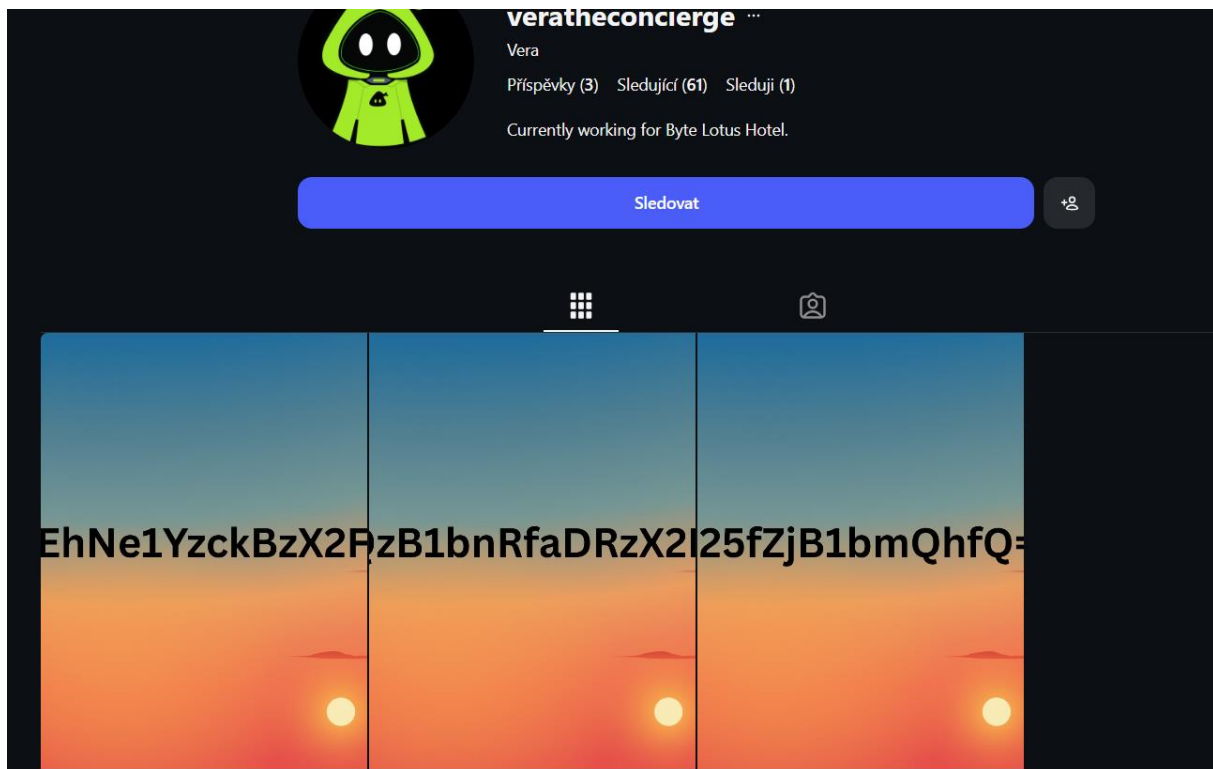

There are only two post:

I decided to investigate the profile, there are 63 followers and only 1 following, I check the following.

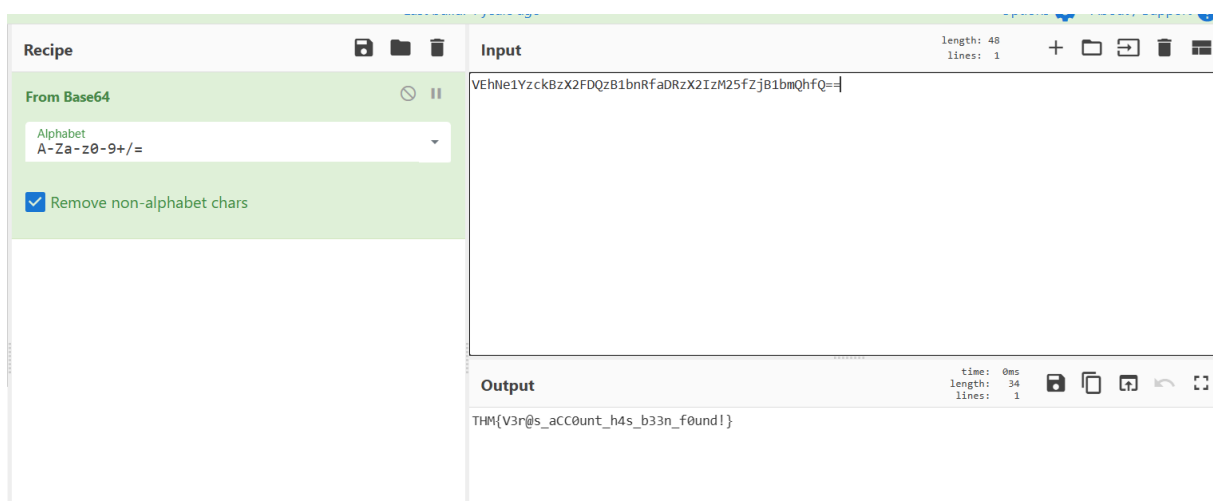

It's Vera – We know her. I go to her profile:

And here I found something very interesting. It looks like base64-encoded string.

I copie text from the picture and put it to CyberChef:

The flag is:
